### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest the light-emitting device as in the claims, including an active layer having a single layer structure, with indium composition ratio as recited - with smooth variation and having the ranges set forth.

Kim et al. is cited to show analogous indium variation in a prior art device, where a barrier layer has more In than a quantum well layer (abstract). The indium variation in the category "Y" references as cited on the international search report also seems to be of this type, i.e., not a smooth variation as now recited, but step-wise variation associated with multiple layers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to S. Crane, whose telephone number is (571) 272-1652.

The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
